COVID-19 CORONAVIRUS

PROTECTIVE FACE SHIELD

COVID-19 Face Shield - MFS-033120

FACE SHIELDS CAN PROVIDE ANOTHER LAYER OF PROTECTION that covers medical masks and entire faces while extending the life of PPE.

The shields are made of clear materials and have a shape similar to a welder's mask. They protect the health care professional and their face mask from coming in direct contact with virus particles spread through coughing or sneezing. And, they extend the life of other medical masks, like the N95, which are short in supply.
