- 3. APPROVAL OF MINUTES-MAY 10, 2024 MEETING**
- 4. OLD BUSINESS**
 1. Since dentists see so many walk in patients, and many patients have to take off work for their dental appt. , the TAC recommends the removal of the Prior Authorization from code D3120- pulp cap-indirect and D4346 - scaling in the presence of moderate to severe gingivitis. This would could possibly save DMS money since a D0140, D9110 or other diagnostic code would not be needed on the first appt. On code descriptor D4346 what does the word, “ after” represent?—‘after oral evaluation”
 2. The Dental TAC is in need of a new TAC member to replace Dr. Phil Schuler.
